

Fiskevegn AS (Norway)

“SAP Business One provides a platform that facilitates the growth of our company.”

SAP Business One version 9.1

“

SAP Business One provides a platform that facilitates the growth of our company. We can run our business processes in our factory and shop operations in the group in a single system. It will support our ambition and our continued growth!

Trond Inge Kvernevik
CEO

”

Industry

Manufacturer of fishing and marine equipment

Employees

45 employees, 20 Business One users

Reasons for choosing SAP

We were running an old system next to various excel files to run our business. We needed better control & insight and wanted a single system to run our purchasing, inventory, manufacturing, sales and financials. The system needed to facilitate growth of our company and we found it in SAP Business one.

Key benefits

Our subsidiary led the way back in 2004 for inventory, sales & purchase, and financials. Now we run our full group in SAP Business One and this includes MRP and Manufacturing. The warehouse and production facility as well as our shop operations have a single platform, giving us full insight and control.

Customer's quote

“SAP Business One was a great solution back when we started ins 2004 and created better efficiency and transparency in our company. We have since expanded the user base from 2 users back in 2004 to 20 users now. Adiles has been great in supporting us and thanks to them we have specific Norwegian functionality that we need like factoring, direct bank integration and e-documents. To maximize efficiency for our company we will continue to invest in SAP Business One know-how“
